

TRAFFIC AND TRAVELLING

In most cities people can choose from various public transportation. The **means of public transport** include buses, trams, trolleybuses, undergrounds and trains. Besides of the inhabitants lots of people commute and go to work by public transport thus public transport must **handle an enormous number of passengers on a daily basis**.

UNDERGROUND:

Underground is one of **the fastest** means of transport. It does not get stuck in the traffic jams and **runs quite frequently**. Unfortunately, they are **crowded and small**. In Hungary you can find undergrounds **only in the capital**. The surface transport is usually slow, especially in rush hours or when an accident happens.

ADVANTAGES OF PUBLIC TRANSPORT	DISADVANTAGES OF PUBLIC TRANSPORT
<ul style="list-style-type: none"> • Runs frequently • Less air pollution • Reduce traffic jams • Options for those who can't drive • You can use your time efficiently while you are on the bus 	<ul style="list-style-type: none"> • It can break down • Can be dirty and disgusting • Can be crowded • Takes more time to get to your destination

UNDERGROUND:

- It can't get stuck in traffic jams
- Runs quite often
- It can be crowded, dirty
- It only runs in the capital

TRAM:

- It goes on rails → won't get stuck in traffic jams
- It is not affected by accidents
- Slower than the bus

BUSES:

ADVANTAGES	DISADVANTAGES
<ul style="list-style-type: none"> • Cheap • They have a route • Have time to read during the trip • It can reach every destination • Can be found everywhere • Reduces the number of cars 	<ul style="list-style-type: none"> • Dirty, lots of people, noise • Delays, gets stuck in traffic jam • Issue of space during a long-term bus travel • Sitting for long period of time is unhealthy • Picking up and dropping off passengers takes time
